

## **Reusable Learning Objects the easy way: how to make high quality eLearning content**

acclaimed one-day hands-on practical workshops for educators and developers

**Presented by:** Dawn Leeder & Heather Wharrad

<http://www.ucel.ac.uk/workshops/>

Universities' Collaboration in eLearning (UCeL) is a multidisciplinary partnership between a number of UK higher education faculties and is pioneering new methods of interactive eLearning content creation, in the form of reusable learning objects for health professional education.

This acclaimed one-day hands-on workshop introduces participants to the principles of reusability and actively engages them in content creation. Tangible workshop outcomes will be a set of specifications for reusable learning objects, digitally archived to the UCeL website.

### **Programme:**

"Because content counts" - background to UCeL

Principles of reusability

Unlocking content

Interactive hands-on group sessions

Recipes for success

Let's get cooking - developing a learning activity

Templates, processes, methods

Peer review and evaluation

Discussions, Q & A, demonstrations

This acclaimed one-day hands-on workshop introduces participants to the principles of reusability and actively engages them in content creation. Tangible workshop outcomes will be a set of specifications for reusable learning objects, digitally archived to the UCeL website. Each participant receives a pack with templates, specifications and evaluation tools.

No computing facilities are required for the participants as all learning activities are designed by hand. The presenters require a data projector and loudspeakers. A flip-chart would be useful.

Maximum numbers of participants: 30 (therefore a room the requisite size, with moveable chairs and tables, is required.)
