5. Would you like to suggest any topics for future workshops **4.4**

(1) Programme soley on the GLO-maker program
(2) Voice-over production for new eTools e.g. Podcasts
(3) More development on GLO-maker - it seems a very good resource/tool
(4) Placements
(9) Podcasting
(15) Building on today - more access to sample resources. Ongoing support and how to access this.
(19) Areas like plagiarism, embedding e-learning in learning environments

6. Any other comments

(5) An excellent course - plenty of time for doing and thinking not just hearing/watching
(8) Excellent course
(9) It might just have been me but I found the initial registration instructions a little confusing - but I was able to get clarification
(10) Interesting to hear ideas from other groups
(11) Hard work but very useful
(12) Very well presented with balanced content and delivery
(14) Examples of more tools available
(15) An excellent opportunity to gain a realistic understanding of IT technology
(17) The practical input from the developers was useful, but I am not convinced we really needed 2 full working days for this exercise, not to mention the cost of external facilities etc. We could have done a comparable amount of work inb a much shorter period of time and without having to listen to presentations that were not relevant to our own work
(18) I felt a two-day residental programme was too long. One-to-one tailored meetings with developers would have met our needs in an afternoon.
(19) Good to get a break to focus on these areas relating to project
